

# Nguyễn Hoàng Huy

Backend / Frontend Developer · DevOps · Software Engineering Student · FPT University

Ho Chi Minh City, Vietnam · +84 366 424 978 · [jayker03212k5@gmail.com](mailto:jayker03212k5@gmail.com) · [GitHub](#) · [LinkedIn](#) · [Portfolio](#)

3rd-year Software Engineering student, oriented toward Fullstack Development and DevOps. Currently interning at Amazing Tech (Sep 2026 – Present, Remote) directly developing the ftacode.com web platform and ordering app. Proven experience building and operating production systems — covering UI/UX development, backend services, database design, and server administration.

## 1. EDUCATION

### FPT University - Ho Chi Minh City

Sep 2023 – Present

#### Bachelor of Software Engineering

- Core coursework: Software Development, Database Management, System Architecture.
- Studying Japanese as a 3rd language within the program.

## 2. WORK EXPERIENCE & PROJECTS

### Software Engineer Intern (Remote) - Full-stack Developer

Sep 2026 – Present

#### Amazing Tech

##### Website ftacode.com:

- Directly took charge of developing and deploying the official web platform for the ftacode brand (FtaCode Tacos) at [ftacode.com](https://ftacode.com).
- Implemented modern responsive UI with **React**, **Tailwind CSS**, and **JavaScript**, focusing on fast loading, user interactions, and visual brand identity.

##### FTAcoder Ordering Application:

- Directly developed the mobile ordering application for ftacode using **React Native** and **NativeWind**, supporting food menu browsing, item customizations, cart management, and seamless order submission workflows.
- Integrated with backend **RESTful API**s to ensure accurate and responsive real-time order processing.

### Software Engineer Intern (Remote) - Backend, Frontend & DevOps

Apr 2026 – Aug 2026

#### Công ty TNHH MTV Vận Tải Xuân Tín Logistics

##### Internal Delivery Management System:

- Designed the system architecture and database schema from scratch for order intake, shipment tracking, delivery, and invoicing workflows.
- Built the backend with **Razor Web (C#)** and RESTful endpoints.
- Used **MySQL** for data storage and **Docker** to containerize the application, ensuring consistent deployment across environments.
- Provisioned the production server, configured the domain, and have owned deployment and ongoing maintenance since launch.

##### Company Website (Landing Page):

- Built a multi-page company website (**HTML**, **CSS**, **JavaScript**), deployed at [vantaixuantin.com](https://vantaixuantin.com).

### Backend Developer · Coursework Team Project

05/2026

#### AutoWash Pro -Automated Car Wash Booking System · SWP391 · FPT University

- Contributed as backend developer on a team project building an automated car wash appointment scheduling system.
- Designed and implemented RESTful APIs using **ASP.NET Core Web API** for booking management, service catalog, and scheduling logic.
- Source: [github.com/ThuanNg05/AutoWashPro](https://github.com/ThuanNg05/AutoWashPro)

## 3. JOB-RELATED SKILLS

#### Programming

C#, Java, JavaScript, Web Technologies (HTML5, CSS3).

#### Frameworks

ASP.NET Core Web API, Razor Web, EF Core, React, React Native, NativeWind, Node.js

#### Databases

MySQL, SQLServer, PostgreSQL, MongoDB

|                             |                                                                                               |
|-----------------------------|-----------------------------------------------------------------------------------------------|
| <b>Tools &amp; Workflow</b> | Visual Studio, Visual Studio Code, Git, GitHub, Docker, CI/CD, REST API, Swagger, Agile/Scrum |
| <b>Soft Skills</b>          | Teamwork, problem-solving, time management, and professional communication                    |
| <b>Languages</b>            | Vietnamese (Native) · English (Conversational) · Japanese (Basic -3rd language at FPT)        |

#### 4. ACCOMPLISHMENTS

---

- **Production Web & App Delivery:** Directly built and shipped the ftacode.com web platform and ordering app at Amazing Tech; built end-to-end production delivery systems at Xuan Tin Logistics.
  - **Research Team Leadership:** Led a 5-member team as Project Lead (PL) in an academic research project on software testing (SWT301). Repo: [github.com/NguyenHoangHuy2103/RT-SWT301-SE1916-G2](https://github.com/NguyenHoangHuy2103/RT-SWT301-SE1916-G2)
  - **Certifications:** Software Engineering (HKUST), Software Development Lifecycle (University of Minnesota) — Coursera
-
